SRS1 – SURVIVAL M16/AR15 RIFLE STOCK

IMI-ZS104

PRODUCT OVERVIEW

A spare magazine that's always there. Built right into your stock. The SRS1 (Survival Rifle Stock) is a direct upgrade to the standard A2 fixed stock on M16/AR15 rifles. Designed and made in Israel, it combines improved ergonomics, additional sling attachment points and a built-in magazine compartment in one slim, tactical stock. When it counts, a spare magazine can make all the difference.

KEY FEATURES

- Built-in magazine compartment: holds a 10-round IMI Defense™ G1 magazine, released by dual push-buttons near the buttpad
- Shielded slide-release latch: the latch is set inside a protective frame, which prevents accidental stock adjustment
- Consistent cheek weld: the angled cheek rest keeps your sight picture repeatable and steady
- Slim, low-snag profile: less bulk and fewer edges to catch on gear, without giving up strength
- Ambidextrous QD sling points: quick-detach ports on both sides, for right- or left-handed shooters
- Extra sling slot: a slot on the bottom of the stock for another way to mount the sling
- Fiber-reinforced polymer: light, rigid and built to last
